AEC
LCA.CL

The Project Management program (AEC) opens the door to a myriad of exciting professions. It is ideal for those who like to develop projects and follow them through to their conclusion.

Being a project manager means being apart from other managers: it means managing temporary and non-repetitive activities and having a certain amount of flexibility in the eyes of the rest of the company.

The program will enable students to use several software programs and apply the various steps of the world-class PMBOK project management reference.

Finally, the student will have all the skills to register for the CAPM (Certified Associate in Project Management) certification qualification test.

Career Prospects

By the end of this program, graduates will be able to apply their knowledge and skills in the following positions:

- Manager of a marketing project
- Manager of an engineering project
- Director of a multimedia project
- Director of an information technology project

Admission Criteria

- Two years of post-secondary study or at least five years of work experience
- Have a training deemed sufficient and meet the admission criteria set for college studies

Concentration Courses

- Project Management Fundamentals (90 h)
- Project Management Software (45 h)
- Project Management Practice (45 h)

Methods of Instruction

On-campus

- At the Montréal campus

Real-time remote learning

- Training provided entirely in distance mode, with a teacher and in real time (synchronous)

Bring Your Own Device

The use of a laptop computer is highly recommended. This laptop must be equipped with the Windows operating system to work with all software. Standard or student license software must be installed when requested by teachers.
