1965 hours

AEC
NTA.1J

At the International School of Fashion, Arts and Design, our students have the opportunity to regularly participate in high calibre projects where they let their talents and their ability to innovate shine. This success bears witness to LaSalle College's excellent program and education, where the teachers themselves are industry professionals.

Using leading-edge computer software, students learn different techniques and know-how in order to conceptualize and produce aesthetic, functional and safe designs for interior spaces in residential, commercial, cultural, institutional and industrial buildings, according to standard practices and in accordance with all applicable codes.

After they graduate, they can work, among others, for architectural and interior design firms, or hotel and restaurant chains. Many of our students work for prestigious business companies such as Andres Escobar & Associates, Igloo Design as well as the Cirque du Soleil and the Grands Ballets Canadiens.

This program is offered at the Montréal and Laval campuses.

Strengths of the Program

What differentiates our Interior Design program (AEC):

- Condensed 3-year program in one year and a half or 2 years (including summer sessions)
- Program providing integrative courses and cross-course practice
- Integration of new technologies including a 3D printer and a hybrid classroom for remote projects
- Possibility of international student exchange between the schools of the LCI Education network
- Courses built around industry requirements
- Organization and coaching for competitions
- Student projects according to industry standards
- Career services for professional development
- Organization of conferences by professionals in Interior Design
- Teachers of outstanding reputation in the design and architecture community

Program-specific Competencies

- Create beautiful aesthetic spaces and designs;
- Respect the residential and/or commercial needs of the client;
- Learn how to select the right materials that meet the industry standard;
- Develop visual & vocal presentation techniques to help you express your ideas;
- Master the technical skills required to draw out technical plans on a drafting table or computer;
- Organize your wild and creative ideas and put them on paper.

Language of Instruction

- Courses are offered in English and French
